

About Bid On Energy

Bid On Energy is a premier energy brokerage and consulting firm with over 10 years of proven experience helping businesses significantly reduce their electricity and natural gas expenses. Founded by a team of seasoned industry professionals, our mission has always been to remove the confusion and inefficiencies surrounding energy procurement by delivering simple, affordable, and transparent solutions tailored to commercial needs. Today, we serve clients nationwide across all deregulated energy markets, providing access to competitive supply rates and flexible contract terms.

Our expertise spans across multiple sectors-from small retail shops and healthcare providers to national manufacturing firms and multi-site corporations. Backed by decades of industry knowledge, Bid On Energy combines strategic insight with advanced AI-driven technology to identify the most cost-effective energy solutions available in real time. Our intelligent platform empowers businesses to compare live offers from dozens of vetted suppliers, enabling smarter decisions, faster contracting, and substantial long-term savings.

With office locations in Delaware and a client base that stretches coast to coast, Bid On Energy has become a recognized leader in the commercial energy marketplace. We maintain strong relationships with top-tier electricity and gas suppliers, giving us the leverage to negotiate highly favorable terms on behalf of our clients. Our consultants are deeply familiar with utility rate structures, tariff strategies, and seasonal market trends-ensuring that businesses receive expert guidance grounded in both data and decades of experience.

At Bid On Energy, trust is the foundation of every client relationship. We are proud to operate with complete transparency-no hidden fees, no surprise charges, and no pressure. Every rate we present is fully vetted and every supplier is reviewed for reliability, regulatory compliance, and service quality. Our clients are never left in the dark; we walk them through each step of the procurement process, answer all questions, and proactively assist with renewals and energy management

About Bid On Energy

strategies.

Our track record speaks for itself. Thousands of businesses have saved thousands-sometimes millions-by switching to a lower-cost supply plan through Bid On Energy. From restaurants and warehouses to commercial office buildings and manufacturers, our clients consistently report 15-35% savings on their utility bills after partnering with us. One of our recent success stories involved a regional manufacturing company in Pennsylvania that cut its annual energy spend by over \$80,000 through a strategic 36-month fixed-rate agreement we negotiated during a low market window.

As energy markets evolve, so do we. Bid On Energy continues to invest in AI technologies and procurement tools that streamline the quoting, comparison, and contracting experience. Our user-friendly platform allows clients to upload a recent utility bill, instantly view multiple rate offers, and execute agreements online within minutes. We also offer full support with energy reporting, load factor analysis, and contract renewal timing-making it easier than ever for businesses to stay in control of their energy spend.

Whether you're a small business looking to protect your margins or a large enterprise aiming to centralize multi-location energy procurement, Bid On Energy delivers the insight, expertise, and tools needed to achieve measurable savings. Our team is ready to guide you through the complexities of deregulated energy markets and provide a customized solution built for your business.
